Quality Control NumberBLOX

NumberBLOX is a set of large, 0-to-9 wooden dominoes that broadens number sense and creativity, handcrafted with select grade maple wood by local artisans in an inclusive work environment utilizing ethical labor practices.

Each block contains values from 0 to 9 on both the top and the bottom (or the left or right depending on what axis you look at). For example, one domino may have 0 dots on the top and 6 dots on the bottom. Each combination is unique and all pieces together make a complete set of NumberBLOX.

_____-

Activity: *We just picked up this set from our factory and your team's task is to work together to figure out if it is a complete set.*

Pre-Task: **How many NumberBLOX do you think will make a complete set?**

Task: **Now take all the NumberBLOX out of the box and categorize them so you can see if it is a complete set. How will you do this? Think teamwork:)**

After task: **How did it feel to perform the activity? What were some of the challenges you experienced doing this as well as the successes?**
